Refurbishment Solutions

From the initial enquiry, you can trust us to support you with your refurbishment and maintenance. We can carry out a site survey and provide our expert recommendations.

For help with the colour scheme, we can provide a mock up of your building on screen, in your chosen colours. On site we can take care of all the health and safety, risk assessments and access equipment.

Using dryfall paints we carefully carry out work with minimal disruption to your operations. All our roof and wall coatings is guaranteed for a minimum of 10 years giving you peace of mind for years to come. We can also create a maintenance plan to ensure your property remains in good condition longer term.

COLOUR MATCHING

Match your existing or brand colour scheme and onsite samples are available.

SOLAR

We can prepare your roof for solar panels and provide a quote for the installation.

ROOF SAFE INSTALLATION

Our teams can install and inspect the line and anchor system for roof safety.

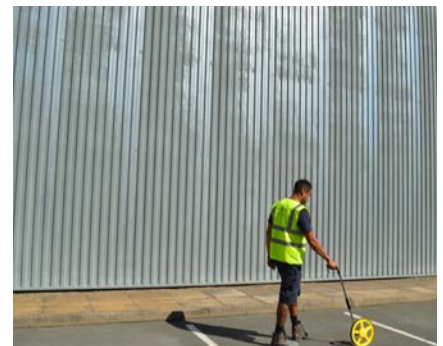

SITE SURVEYS

Free site surveys are available or our drone survey can view roofs and hard to reach areas.

DIGITAL VISUALISATION

See your building on screen, in your chosen colours to help with decision making.

MAINTENANCE PLANS

We can put in place maintenance plans to take care of your building long term.

A WORLD OF CHOICE

There are many solutions available depending on the type of cladding, coating choice, warranty requirement, project location and branding demands. Our premium coatings can be colour matched to your specific scheme or to suit the existing facade, and the coating specified will meet the needs of the building materials and environment. Onsite samples and testing can be carried out before work begins, giving you confidence that the right system for your premises will be installed.

WALL CLADDING

Metal, Wooden or Masonry wall cladding can all be refinished to restore it and extend its lifetime.

ROOFS

Our high performing roof coating systems will refurbish your roof for long lasting protection.

SHOP FRONTS

Refurbish your shop front to look attractive and welcoming, making a good first impression.

GUTTERS

Cleaning, repair, re-lining or replacing your gutters to ensure they are working efficiently.

DOORS & WINDOWS

Roller doors, fire doors, access doors and windows can all be refinished to a high standard.

REPAIR

When damage or failures leave only the option of repair or replacement we can put it right.

REFURBISHMENT SOLUTIONS

If your building is looking faded, the paintwork is cracking or peeling, or there are signs of chalking then now is the time to refurbish the exterior. If left the condition can worsen to the extent that replacement would be the only option.

Using a high performance coating system to re-coat the wall or roof cladding will protect it for years to come, prevent any further deterioration and will leave the building looking like new again.

Excellent service. Nothing too much trouble and everything arranged to fit in with our requirements

Karen Martin - Porcelanosa

From start to finish Mike, Jake and the team have been brilliant, carrying out the work to a very high standard and keeping us fully updated along the way. A pleasure to work with!

Sean Holmes - Synertec Ltd

Very professional staff, exceptional work ethic and a pleasure to deal with.

Chris Cain - Motorpoint Widnes

BEFORE

AFTER

Wall & Roof Coating

Our specialist cladding refurbishment team are incredibly talented and have had many years' experience repairing and re-painting wall and roof cladding on a wide range of commercial and industrial properties across the UK.

Over time, due to age, weathering and general wear, the external facade will require some maintenance and may require a full refurbishment. Our team can offer the solution.

New cladding sheets often come with a guarantee but even these sheets will start to deteriorate over time.

Not new forever

First the paintwork fades in colours and then shows signs of chalking

Refurbishment saves money

This is the time to refurbish before any damage to sheets occurs.

Replacement is the only option

If left the paint will crack and metal sheets will start to corrode. Once the sheets fail this needs a replacement.
